

Cut anti-caking costs to $\frac{4}{10}$ ¢ per pound with new SYLOX[®] silica.

If you're in the market for low-cost silicas, try new SYLOX silica. With high purity, high performance and a low price, it's the best silica for your money.

SYLOX silica gives you more particles per pound for better inter-particle separation. Plus more surface area to adsorb caking constituents. So you get great

flowability, in process and on the shelf.

SYLOX silica meets the requirement of the Food Chemicals Codex for silicon dioxide and of the Food and Drug Administration in Title 21 of the Code of Federal Regulations Section 172.480. Cut your anti-caking costs. Evaluate new SYLOX silica.
