

*Any questions about **Flavor**?*

- How can I find out what monosodium glutamate will do for a new food product I'm testing?
- How can I tell how much monosodium glutamate to use in my products?
- Can you really use home test panels or consumer panels to predetermine flavor acceptance?
- How can I tell how much monosodium glutamate is already in a food product?
- What does it really cost to add monosodium glutamate to my products?
- How can I get a working sample of Ac'cent brand monosodium glutamate?
