

Our hallmark, your guarantee.

Few names mean as much as this name does to meat and food processing.

Simply because the name DMV signifies a range of milk proteins, lactose and milk derivatives for an impressive variety of applications in meat and bakery products, desserts, soups, sauces, baby and dietetic foods, instant foods and biscuits, and pharmaceuticals.

DMV Milk Proteins are made from choice raw material... the pure skim milk from the finest dairy farms in Holland, a country with an inter-

national reputation for high quality milk and dairy products.

DMV research and quality control help to produce this range of

milk derivatives to high standards. Products backed by the kind of expertise you expect from one of the largest milk protein and lactose manufacturers in the world. Products you can trust.

It's how we made our mark on the world of meat and food processing, and pharmaceuticals; all over the world.

Ask anyone.

Fill out the coupon and mail it to DMV for brochures and product information.
