

What Increases Juice Yields **Clarex[®] ML** Can Go To Work For You

Clarex ML is an aggressive Solvay Enzyme that increases juice yields. This carefully controlled blend of specific enzyme components results in a powerful macerating enzyme system. It also depectinizes, lowers viscosity, provides rapid clarification and improves juice quality.

But we know it takes more than just a hard-working enzyme to get the job done – it also takes the dedicated Solvay team of enzyme experts working with you to improve productivity.

That's Solvay teamwork and technology – put it to work for you.
