

Screens, woven wire for food processing

Cleveland specializes in weaving and fabricating wire screens — screens designed to meet the corrosion-resisting requirements of food processing applications. Stainless steel, monel and nickel alloys are expertly woven for sizing, separating, washing, dewatering and screening. Get acquainted with Cleveland. Catalog 160 contains complete facility data and woven wire specifications.

Sunkist garlic?

...re.
 Or spearmint or cinnamon or pepper or any other oil-
 ed (or oleoresin) flavor. Especially citrus, of course.
 h our Perma-Stabil® process we can encapsulate
 ors in an airtight, water-soluble matrix which protects
 n from oxidation, rancidity, or loss
 otency
 Many well known citrus-flavored
 mixes from leading com-
 es depend on Perma-
 oil flavors. When liquid
 added, all the natural
 ors are released as
 n as the day they
 re trapped.
 If you've got a

product with citrus flavor (or any other oil-based flavor), don't settle for spray dried products which can't protect delicate flavors as the Perma-Stabil process can. Mail the coupon below for samples and literature.

GENTLE HANDLING is...
