

CONSISTENCY...our reputation depends on it.

Meeting specifications... first time... every time... with exciting, new colors is basic with Rona Pearl.

Our imaginative new TIMIRON® SUPERS are a case in point. Intense, lustrous interference colors with stay-put power that helps you create a dazzling range of iridescent effects in lipsticks, nail enamels, eye makeup and pressed powders. Especially effective in transparent formulas.

Just as fascinating to formulators are the exciting effects produced by our new TIMIRON Satin, COLORONA® Russet and TIMIRON Sun Gold Sparkle. All of these... plus our new TIMIRON SUPERS are available as powders and dispersions for immediate shipment. As always, Rona laboratory facilities and technicians are ready to offer individual, personalized service. Write or call for literature and samples.
