

Put our cat in your soap.

MERQUAT® 550, the different kind of cationic polymer

gives liquid soap a rich, dense lather,
extra slip and lubricity...and
enhances pearlescence.

It gives a nontacky,
nongreasy residual
feel...leaves
hands and body
powdery smooth.

Psssst...that's not all!

MERQUAT 550 is easily
formulated and economical too.
Write for more facts that
could help make your liquid
soap the cat's meow!

I'd like to meet MERQUAT® without delay.

Please send me literature.
