

Picture of another successful pie

## made with REDISOL® #4 Tapioca Starch

Fruit fillings are so good—customers really enjoy them. No wonder. REDISOL #4 is a precooked *tapioca* starch which gives them . . .

**Clarity**—for top eye appeal

**Smoothness**—for unexcelled mouth feel

**Appearance**—fruit remains natural

**Guards flavor**—no cereal taste—brings out real fruit flavors

Use REDISOL #4 with fresh, canned or frozen fruit without cooking. It dissolves quickly in cold water and fruit juices. Eliminates thawing, cooking, mixing, cool-

ing—because pie fillings with REDISOL #4 are made at room temperatures ready to go to the oven.

Try a 50 lb. demonstration shipment. We will send recipes. Produce better pies at lower cost. It's worth investigating. Right?
