

There's a good reason why **Enzyme is our first name**

Developing enzyme uses and new formulations is our forte . . . and we're very good at it. Today's challenging market requires continuing progress in product improvement. Enzymes are becoming an increasingly important element in new products development and processing.

Enzyme Development Corporation is a leading supplier of enzymes and enzyme formulations for the food, pharmaceutical, beverage, and sanitary industries.

Amylases – carbohydrases (fungal and bacterial).

Proteases (fungal, bacterial, botanical and animal).

Cellulases, hemicellulases.

Lipases.

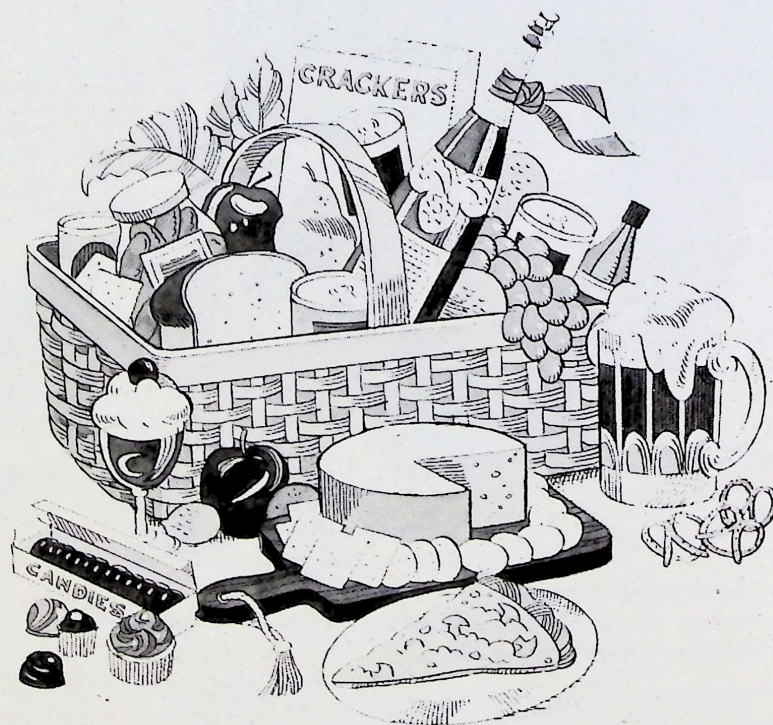

Immobilized enzymes for repeated use.

**Enzymes in pre-measured packets,
tablets and encapsulated form.**

Our laboratory and technical sales and service staffs are ready to supply the enzyme system most appropriate for your specific application. In addition, Enzyme Development Corporation's technical capabilities are supplemented by the research and laboratory facilities of leading domestic and overseas enzyme manufacturers whose products we distribute exclusively in the United States.

We're ready to help with your next product formulation.
