

Pluronic® Surfactants: Cosmetics

Hot Weather Additives.

Just the surfactants you need when your products are soaking up the sun.

Partly because Pluronic surfactants in everything from suntan products to hair dressings, can't harm skin. All grades are non-sensitizing, non-irritating, and virtually non-toxic. Many have U.S.

Food and Drug Administration listings. And, Pluronic surfactants are nonionic and 100% active.

They have no odor or color. Physical forms range from liquids and pastes to powders and cast solids. Properties vary from almost complete water insolubility to

no cloud point even at 212°F.

Add Pluronic surfactants and make your cosmetics work better wherever they go. Contact us.
