

We make the grade for you

SOLKA-FLOC[®]

Powdered cellulose for the food industry

Low caloric content and high fiber are the reasons why Solka-Floc makes the grade for you.

And, there are eight different grades of powdered cellulose made especially for the food industry, one of which will meet your specific needs.

Some product applications include low calorie baked goods, high fiber cereals, powdered beverage products, spice and flavor carriers, sauces and dressings.

For detailed information about all of the different grades of Solka-Floc including specifications, typical analysis, product applications and benefits, and for samples for laboratory evaluation, please call or write:
