

THE MAGIC OF MAILLOSE™

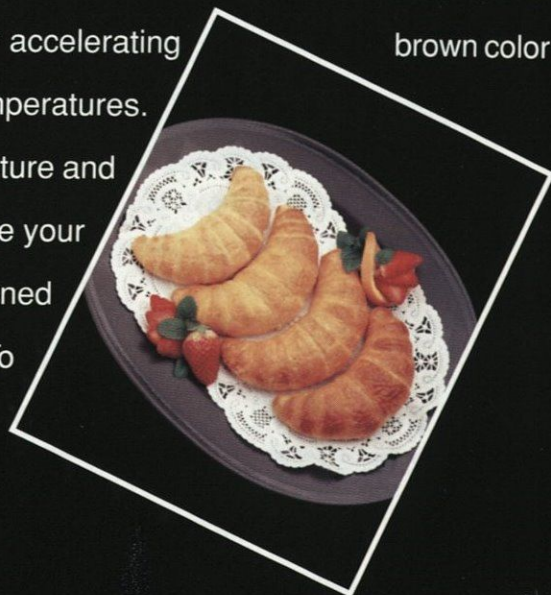

No more of the old "Now-you-see-it, Now-you-don't" trick!

New **Maillose** natural browning agent from Red Arrow is capable of providing oven roasted color to a wide variety of food and meat products without color fade. It's only a matter of seconds before **Maillose** works its magic on your product, facilitating shorter processing time by accelerating brown color development. You can even obtain rich brown color at low temperatures.

You'll enjoy the benefits of more moisture and increased yield in your products, while your customers will love the appeal of browned food straight from their microwaves. To learn more about the magic of

MAILLOSE, call the Red Arrow food technology team at 414-683-5500.

Visit us at IFT Food Expo, Booth 4847
