

We don't produce it

Not the milk (don't even have a cow).
Nor do we make the cheeses, baked goods, prepared salads or any other food product sold today.

We don't package it

Don't make the boxes, jars or bottles, yet we still protect the food product and help wrap up the sale.

We do preserve it

Effectively, safely and economically from undesirable mold and yeast growth.
How? With **Sorbiace**, the high quality sorbic acid, and **Sorbiace 150**, the water soluble potassium sorbate (for high moisture foods).
