

FAVORIED!

FAVORITE!

Methyl salicylate is one of the most widely used aromatics because of its versatility. And Penick has long been equally popular as a leading producer.

Reasons? Superior quality, dependable supply.

We produce consistently high purity material with excellent flavor, color and odor characteristics. Customers get prompt deliveries, too, from five coast-to-coast stock-points, in drum or carload quantities.

We'd like to demonstrate our quality and service on your next order.
