

NOW IT CAN'T BE TOLD **BECAUSE**
WE JUST DON'T KNOW

Fro-Dex[®] corn syrup solids has proven itself an excellent viscosity-controlling ingredient, a bland carrier and an effective plasticizer. It balances humectant properties, adjusts solids, controls sweetness, is economical and comes in a variety of DE's and particle sizes.

Now tell us, what do you make of all this? Our Technical Service will be glad to help determine if your product or process is one of the hundreds that can use Fro-Dex to good advantage. Call Mr. Ueberbacher.
