

Modern Maid Japanese-Style Bread Crumbs

Orient-ation course for your product line

Developing a line of products to meet the current demand for Oriental delicacies no longer requires the services of a Japanese food expert. All you have to do is bread your fish, meat, poultry items or vegetables with Japanese-Style Bread Crumbs.

The crisp, crunchy texture, delicate flavor, and rich, golden color of Japanese-Style Bread Crumbs contribute Oriental splendor to "heat-and-serve" products as well as "bread-and-freeze" pack items. Yet this unique breadier is produced in the United States by an exclusive Modern Maid process.

Our representative will be ah so pleased to help you Orient your product line. Just honor us by using this coupon.
