

To keep your turban dry when it rains,  
use an umbrella . . . but . . .

## for more uniform water-soluble gums, depend upon Penick!

Nature is never predictable, but there are reliable ways to compensate for the inevitable variations. Natural differences in water-soluble and bulking gums need not be a problem.

Penick controls uniformity of gums with a unique process called *Evenizing*®. We deliver as consistent a product as it is possible to achieve.

What's more, Penick gives you further assurance of unfailing high quality. We closely

supervise the selection of gums where they are grown and gathered—and process them *in our own mills*. At no time are they beyond our direct control right up to shipment.

In addition, our world-wide resources and amply stocked warehouses assure dependable, stable supply.

We'll gladly send samples of the gums listed and quote on your requirements.
