

We Make Foods Healthier.

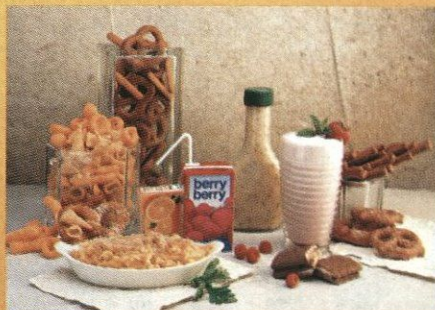

With Watson's Nutritional Ingredient Systems.

For over 50 years, Watson has specialized in the nutritional enhancement of processed foods of all kinds.

Today we offer you innovative products such as Watson's White Wheat Fiber™ and specially-formulated Vitamin/Mineral Premixes. To meet your batch requirements, we can also package ingredients in our premeasured Sol-u-Pak® edible water-soluble film packet delivery system.

And, we provide you with the expertise it takes to incorporate micro-nutrients without upsetting your product's delicate balance of flavor, color and texture.

If you're striving to maximize the nutritional appeal of your processed foods, talk to Watson Foods. We can help make your foods—and your bottom line—healthier.
