

# Why Exercise? Saladize!

Xanthan has one major drawback...a stringy texture.

That's fine for some products, but when you want a smooth, rich and creamy mouthfeel use SALADIZER® 250P from TIC GUMS.

SALADIZER 250P gives your product the rich taste your customers want in a one-step dry mix.

Come to our pilot plant facilities and see how *our* products can aid *your* products.

After 78 years of innovative gum TICnology you might say we wrote the book...which we did. Write us for your free copy of GUMS IN SALAD DRESSINGS.
