
Q: Who Turns More Corn Into Sweetener Than Anyone Else In The U.S.A.?

A: Staley!

This year Staley will produce over 3 billion pounds of sweetener, and next year we'll increase that to nearly 4 billion. But there's more to this than just a set of impressive numbers.

We believe that being the leading supplier of sweeteners to the food industry carries a certain responsibility... a dedication to providing more and better sweeteners in the coming years, and we intend to live up to that commitment.

From D.E.'s of 19 to 99, from barely sweet to very sweet; from Baumes high-to-low; wet or dry, Staley offers them all. Whatever your needs,

we'd like to discuss them and help you select the sweetener or sweetener blend that's best for you.

The next time someone tells you about their experience in sweeteners, ask them if they're from Staley.
