

Will your sodium bisulfite pass the shaker test?

Put a little of the sodium bisulfite you are now using in a vial, cap it, and shake it up and down a few times. If you have a lot of dust and caking, then you certainly don't have Virginia bisulfite.

Because Virginia's even consistency eliminates dusting, lumping, and caking. Foreign matter is almost nil. Every bit is of food grade quality (we'll even supply it Kosher, if you need it). For any process, it's the best.

This consistent, reliable quality costs you no more. Because sodium bisulfite is a major product with us, not a sideline. Our customers are important to us and we want to keep

them satisfied, so we use extra care in manufacturing.

Call or use the coupon for more information and a free sample of this superior bisulfite. We'll get it out to you fast. Like we make our regular deliveries.
