

If we could list all the cosmetics manufacturers using Ashland chemicals, you'd see a veritable "Who's Who" of fast movers on the beauty aids shelf.

That's because Ashland makes a comprehensive line of chemicals for cosmetics. Like Adol® fatty alcohols and Hydrofol® fatty acids.

And Varion® amphoterics, nonionic and anionic surfactant concentrates, Starfol® fatty esters, ethoxylated esters, hair dye intermediates, plus an

almost unlimited selection of quaternaries. All meeting rigid quality requirements of the personal care products industry.

Which means that whether you make hair conditioners and colorants, anti-perspirants, creams and lotions, aerosols, lipsticks, shampoos, or anything in between, Ashland has the chemicals to make your product a beauty.

For information, contact: Ashland Chemical Company, P.O. Box 2219, Columbus, Ohio 43216.

**Ashland makes all kinds of
chemicals for all kinds of beauty.**
