

Son of a gun! A defoaming surfactant.

SURFYNOL® nonionic surfactants are unique: they're defoamers as well as surfactants. They're wetting agents, dispersants, viscosity stabilizers and defoamers.

Some chemists find this unbelievable, until they try one. That's why we're offering samples: what words can't do, performance can.

So far, the curious properties of this compound have aroused the intense interest of paint and coatings producers, paper manufacturers, dyestuff producers and many others.

Find out what a SURFYNOL can do for you: send us the coupon and we'll send you literature describing the entire SURFYNOL line (there are 13 at this time). Then tell us which one you want and we'll send you a free 8-ounce sample.

Or write on your letterhead explaining your needs and we'll send the surfactant we think is best for you. For faster action, just call Bruce Dructor at (215) 687-6150.

Air Products and Chemicals, Inc.
Acetylenic Chemicals Division
Five Executive Mall, Swedesford Road
Wayne, Pa. 19087

Please send me literature on the entire SURFYNOL® line.
