

NATURAL EMOLLIENTS WITH SUPERNATURAL BENEFITS

Wecobee® emollients add smoothness and body to bath oils, creams and lotions, shampoos, clear gels, lipsticks and more! Wecobee based lipsticks and glosses are creamier. They bridge wax systems and minimize exudation.

Wecobees improve product stability. They resist oxidative deterioration. Compatibility with fats, waxes and lanolin is assured, batch after batch.

Your products have elegant alternatives to cocoa butter and absorption bases. Unnoticeable Wecobees have low irritation, bland taste and controlled melting point ranges.
