

Champion protein converters train on CH_3SH .

With methionine, turkeys get even more efficient in converting vegetable protein into animal protein.

Synthesized from methyl mercaptan, methionine works wonders as a poultry-feed supplement. It also fortifies single-cell protein, which has significant nutritional value.

The sulfur radical has a way of doing the unusual. We recognized its versatility many years ago. Then, when the demand for methionine and for other agrochemicals developed, we were

ready with the mercaptan capacity.

As the world's largest producer, Pennwalt now offers the widest variety of alkyl mercaptans from plants in the United States and Europe. And we're dedicated to continuing expansion in production and technical competence.

We can talk mercaptans with you anywhere. Contact any of the locations listed below, or write for our literature. Indchem Division, Pennwalt Corporation, Three Parkway, Phila., Pa. 19102.
