

Little Boy Blue come blow your horn:

**Cargill's in the corn syrups, corn starches,
soy proteins and vegetable oil business!**

Once upon a time (over a century ago), Cargill got involved in basic food ingredients. Today, we're still involved. Only much more so — now we provide *all* of the following products to food manufacturers who want consistent quality, competitive prices and on-time delivery: corn syrups and starches / soy flour and grits; textured protein products / edible vegetable oils including deodorized 76° coconut oil, soybean salad oil and food-grade lecithin. And our customers are living happily ever after!

For the whole story, write to Jim North, V.P., for our new brochure, *Cargill Is . . .*
Cargill, Incorporated, Cargill Bldg., Minneapolis, Minn. 55402.

Cargill looks for better ways.
