

COUNT ON MILES

for citric acid and enzymes to help develop tomorrow's foods today

Miles puts biotechnology to work to create new and better solutions to food processing problems. By utilizing scientific research and human resources, we open new avenues of applications for citric acid and enzymes. The result is innovative food products for today's competitive market.

At Miles, we have a long-standing tradition of working closely with our customers in developing practical formulations that work for their products and processes. And we back up that tradition with the kind of service and production controls that assure prompt delivery of consistent quality citric acid and enzymes.

Miles has a legacy of innovation in the food industry. Count on us as your partner in producing the foods of the future today.
