

The eye of newt and the oil of spearmint

Not an altogether unlikely combination when you consider the availability of each.

Both eye of newt and oil of spearmint are difficult to obtain and keep on hand. They must be handled with delicate care, packed, and often transported very long distances. And, of course, both are things of nature found in varying amounts, sizes and shapes. Unreliable. Very expensive.

We at Glidden Organics International

have a solution to your oil of spearmint problems. Our oil of spearmint, an artificial flavor.

It is always available. Consistently fragrant and flavorful. Easily ordered. Easily stocked.

You will use it in confections and gum. In dentifrices, toothpaste, and mouthwash. And you will find it very, very economical. Synthesized Essential Spearmint Oil, a little magic from Glidden Organics.
